

Blackjack 21 + 3 with Top 3

HOW TO PLAY

21 + 3 is a fun, exciting variation of the standard casino game of blackjack. After making a wager on the blackjack hand, you may make a side wager that is based on a 3 card poker hand.

The side wager is a bet that your original two cards combined with the dealer's up card will combine for a winning poker hand. If the three cards combine to make a flush, straight, three of a kind or a straight flush you win. All winning side wagers are paid 9 to 1.

The game is dealt like a regular blackjack game with two cards to each player and one card up and one card down to the dealer. At this point the dealer will take all losing 3 card wagers and pay all winning wagers 9 to 1. After all 3 card wagers are settled, the hand continues with standard blackjack procedures. See Blackjack gaming guide for all pay outs and rules.

For additional information, dealers are always at your service to provide more in depth information about the rules of all our games.

Top 3

HOW TO PLAY

Top 3 is a second house banked optional proposition wager used in the game of blackjack in conjunction with the +3 wager. The Top 3 wager can only be offered on blackjack tables with the +3 wager.

Top 3 is available only for 4, 6 and 8 deck shoe games.

Players can only make the Top 3 wager if they make the +3 wager along with their blackjack wager.

The Top 3 wager is based on a three card hand using the dealer's one (1) up card and the player's two (2) initial up cards to form a three card poker hand. Winning hands of Three of a Kind Suited, Straight Flush and Three of a Kind are paid according to the posted pay table.

The outcome of the primary blackjack wager has no bearing on the Top 3 wager and vice versa. A player can win on one and lose on the other.

Other than the payment or loss of the proposition wager on the player's first two cards and the dealer's up card, there is no affect on the primary game of blackjack and no changes in dealing procedures or player strategy.

The side wager is a bet that your original two (2) cards combined with the dealers up card will combine for a winning hand. If three cards combined make a Three of a Kind Suited 270 to 1. A Straight Flush 180 to 1, Three of a Kind 90 to 1.
